Mandriva

MOVE - Take off into the **Linux** world

You have always wanted to try out Linux but were afraid not to be up to the task?
Move allows you to use Linux on your computer without any need to install or configure anything and without altering your computer in any way!

Discover Mandriva Linux with Move

Nothing is simpler than starting up Move: just insert the CD-Rom in your drive and turn on your computer.

Secure

• Move does not require an installation.

• Move does not modify anything on the host computer.

• Move cannot be damaged: everything is on the CD-Rom.

Anywhere, anytime

• Move works on most computers.

• Using a USB* key, Move saves all your data and settings.

• Move also allows read access to documents on the host computer.

(*) A list of compatible USB keys is available here:
