Tools Used in The Making of This Manual

This manual was written in XML *DocBook*. The set of files involved were managed using Borges (<http://linux-mandrake.com/en/doc/project/Borges/>). The XML source files were processed by *xsltproc*, *openjade* and *jadetex* using a customized version of Norman Walsh’s stylesheets. Screen shots were taken using *xwd* or *GIMP* and converted with *convert*. All these software are available on your **Mandrake Linux** distribution, and they are all free software.
